

A8 – Overall view (after Typhoon)	A8 – Crown condition. Slightly dieback was observed.
 <p>14 11 2024</p>	 <p>09 11 2024</p>
A8 – Pruning wound previously damaged by typhoon KOINU (Oct 2023)	A8 – Trunk and root condition.
 <p>09 11 2024</p>	 <p>09 11 2024</p>

A12 - Overall View

A12 - Dieback observed.

A12 – Slightly lean was observed during post inclement weather inspection on 14 Nov 2024

A12 - The slightly leaning tree was reinstated on 14 Nov 2024 evening

A12 - Foliage density is still low.

A12 – Trunk and root condition

A12 –Wound at trunk base

A12 – Decaying wound on trunk

Tung Chung New Town Extension – Site Formation and Infrastructure Works at Tung Chung Valley, Phase 1

Manual watering was carried out for A8 during the reporting period. The watering frequency is one to two times per week.

Manual watering was carried out for A12 during the reporting period. The watering frequency is one to two times per week.

CCTV and fencing are in order.

Grass cutting and weeding were done on 11 Nov 2024

Tree Schedule for Survey of Plant Species of Conservation Importance

No.	Species		Conservation Status	Measurements			Tree Condition (Good(G) / Average(A) / Poor(P))			Recommendation (Retain / Transplant / Remove)	Findings	Remark
	Scientific Name	Chinese name		DBH (mm)	Height (m)	Crown (m)	Form	Health	Structure			
A8 (T8996)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	110	5	4	P	A	P	Transplant	There was dieback. Foliage density reduced after a typhoon event dated 13-14 Nov 2024	Originally located at Site 1. Trunk wounds were observed before transplant operation. Shallow root. Sudden defoliation happened in May 2023 but recovered in Aug 2023. It was translocated to the temporary holding nursery on 29 Sep 2023. A branch (5cm) was broken and foliage density decreased due to typhoon in Oct 2023.
A12 (T3537)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	185	8	3	P	P	A	Transplant	There was dieback. The foliage density is low. It was slightly lean after a typhoon event dated 13-14 Nov 2024. The tree was reinstated on 14 Nov 2024.	Originally located at Site 5. Trunk wounds were observed before transplant operation. Shallow root. Original root ball was full of stones which were removed partially during the translocation. It was translocated to the temporary holding nursery on 29 Sep 2023. It collapsed during typhoon dated Oct 2023 resulted in largely reduction in foliage density.

*Note:

DBH refers to Trunk Diameter at Breast Height

The Tree preservation work commenced in Jul 2022

RPPHK - Species included in AFCD publication "Rare and Precious Plants of Hong Kong (2003)"

Cap.586 – Native plants listed in Protection of Endangered Species of Animals and Plants Ordinance, Cap. 586.

IUCN:VU – "Vulnerable" under IUCN Red List of Threatened Species
