

<p>A8 – Overall view</p>  A photograph showing the overall view of tree A8. The tree is supported by a tripod of wooden poles and a black mesh cylinder. A red safety net is draped over the top of the support structure. The tree is situated in a grassy area with a white and red plastic barrier and a black tarp in the background. A yellow date stamp '05 03 2025' is visible in the bottom right corner. <p>05 03 2025</p>	<p>A8 – Crown condition.</p>  A photograph showing the crown condition of tree A8. The tree has a dense canopy of green leaves. A yellow date stamp '05 03 2025' is visible in the bottom right corner. <p>05 03 2025</p>
<p>A8 – Pruning wound previously damaged by typhoon KOINU (Oct 2023)</p>  A close-up photograph of a pruning wound on the trunk of tree A8. The wound is a dark, irregular shape on the light-colored bark. A yellow date stamp '05 03 2025' is visible in the bottom right corner. <p>05 03 2025</p>	<p>A8 – Trunk and root condition.</p>  A photograph showing the trunk and root condition of tree A8. The tree is supported by a tripod of wooden poles and a black mesh cylinder. A red safety net is draped over the top of the support structure. The tree is situated in a grassy area with a white and red plastic barrier and a black tarp in the background. A yellow date stamp '05 03 2025' is visible in the bottom right corner. <p>05 03 2025</p>

<p>A8 – Decaying wound at trunk base (size: ~180mm x170mm)</p> 	<p>A8 – Decaying wound on trunk</p> 
<p>A8 – Ant nest was found at the pot</p> 	

A12 - Overall View	A12 - Dieback observed. Dead branches were removed on 07/12/2024
 A photograph showing the overall view of tree A12. The tree is a young, slender specimen with a sparse canopy of green leaves. It is supported by a red safety netting structure that is anchored to the ground with wooden poles. Behind the tree is a row of white and red plastic safety barriers. The background shows a dense line of trees under a grey, overcast sky. A yellow date stamp '05 03 2025' is visible in the bottom right corner of the image. <p>05 03 2025</p>	 A close-up photograph of tree A12, focusing on its trunk and upper canopy. The tree's trunk is relatively straight and has a light brown bark. The canopy consists of green leaves, but there are visible signs of dieback, with some branches appearing bare or sparsely leaved. The background shows other trees and a grey sky. A yellow date stamp '05 03 2025' is visible in the bottom right corner of the image. <p>05 03 2025</p>
A12 - Foliage density is still low.	A12 – Trunk and root condition
 A photograph showing the foliage density of tree A12. The tree is shown from a low angle, looking up at its canopy. The leaves are green but appear sparse, indicating low foliage density. The background shows a grey sky and other trees. A yellow date stamp '05 03 2025' is visible in the bottom right corner of the image. <p>05 03 2025</p>	 A photograph showing the trunk and root condition of tree A12. The tree is supported by a red safety netting structure. The trunk is visible, and the roots are exposed at the base of the tree. The background shows a row of white and red plastic safety barriers and a grey sky. A yellow date stamp '05 03 2025' is visible in the bottom right corner of the image. <p>05 03 2025</p>

<p>Ant control for A8</p>  <p>06 03 2025</p>	<p>Ant control for A8</p>  <p>11 03 2025</p>
<p>Ant control for A8</p>  <p>14 03 2025</p>	<p>Grass cutting and weeding on 4 March 2025.</p>  <p>04 03 2025</p>

Manual watering was carried out for A8 during the reporting period. The watering frequency is one to two times per week.

Manual watering was carried out for A12 during the reporting period. The watering frequency is one to two times per week.

Manual watering was carried out for A12 during the reporting period. The watering frequency is one to two times per week.

D-cidect emulsifiable insecticide for ant control

Tree Schedule for Survey of Plant Species of Conservation Importance

No.	Species		Conservation Status	Measurements			Tree Condition (Good(G) / Average(A) / Poor(P))			Recommendation (Retain / Transplant / Remove)	Findings	Remark
	Scientific Name	Chinese name		DBH (mm)	Height (m)	Crown (m)	Form	Health	Structure			
A8 (T8996)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	110	5	4	P	P	P	Transplant	Ant nest was found at the pot. Although ant is not plant pest, insecticide was applied on 6, 11 and 14 March 2025 to lower the population. The foliage density is low.	Originally located at Site 1. Trunk wounds were observed before transplant operation. Shallow root. Sudden defoliation happened in May 2023 but recovered in Aug 2023. It was translocated to the temporary holding nursery on 29 Sep 2023. A branch (5cm) was broken and foliage density decreased due to typhoon in Oct 2023.
A12 (T3537)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	185	8	3	P	P	A	Transplant	The foliage density is low.	Originally located at Site 5. Trunk wounds were observed before transplant operation. Shallow root. Original root ball was full of stones which were removed partially during the translocation. It was translocated to the temporary holding nursery on 29 Sep 2023. It collapsed during typhoon dated Oct 2023 resulted in largely reduction in foliage density. It was slightly lean after a typhoon event dated 13-14 Nov 2024 and reinstated.

*Note:

DBH refers to Trunk Diameter at Breast Height

The Tree preservation work commenced in Jul 2022

RPPHK - Species included in AFCD publication "Rare and Precious Plants of Hong Kong (2003)"

Cap.586 – Native plants listed in Protection of Endangered Species of Animals and Plants Ordinance, Cap. 586.
